## TRANSFUSION RELATED FATALITIES

## SESSION DETAILS

### DESCRIPTION:

This presentation summarizes reports from the FDA regarding transfusion-related fatalities reported to them since 2005. It includes a discussion of trends and causes of fatalities and an example of an in-depth investigation of a fatal hemolytic transfusion reaction.

### OBJECTIVES:

1. List the most common causes of fatal adverse events related to transfusions
2. Describe the antibodies and infections that most commonly cause fatal reactions
3. Understand the tools used in conducting post-mortem immunohematology investigations

### Intended Audience:

Laboratorians, blood collectors, blood suppliers, and transfusion service personnel

### Level of Instruction:

Basic to Intermediate
